## QuickFix

### Spare Part Service for Control Systems

The QuickFix Service is offered by SMB in Vlotho and helps you to reduce your costs for machine park maintenance. Make use of the QuickFix Service for optimization with regard to function and price and thus, achieve sustained competitive advantage.

### Ferrocontrol and Indramat Actuators Available Immediately from Stock

We always hold a various choice of used actuators and planetary drives on stock, completely overhauled and tested, e.g. *Ferrocontrol* type HD, FMS or FMR or *Indramat* type MAC. As a genuine spare part is often very expensive, this is a cost-effective alternative. And also the matching gear drives are mostly available immediately from stock.

*"My colleagues and I help you to minimize down times. You as our customer are the main focus of our business. We support you personally and with great commitment. We're there, when you need us."*

ACTUATORS  
**WARRANTY**  
12 MONTHS
