## QuickFix

Maintenance and Repair of  
Priess & Horstmann Drilling Drives

Apart from manufacturing our own drilling drives, we are also specialised in maintaining and repairing products of other well-known manufacturers.

Priess & Horstmann machines are excellent for your production. However, even top-quality products naturally wear out in time. With our QuickFix Service your machines get back into operation reliably.

We guarantee a high service and repair friendliness in case of machine malfunctions. Repairs or maintenance are usually done within shortest time. The goods can be repaired at your premises or in our factory at a 24-hour-service, if it is very urgent.

We look forward to supplying you with spare parts for Priess & Horstmann drives, e.g. drilling spindles or drive spindles.

*"My colleagues and I help you to minimize down times. You as our customer are the main focus of our business. We support you personally and with great commitment. We're there, when you need us."*

# SMB

**Biesse**  
**Holetronic**  
**Nottmeyer**  
**Weeke**

**MAW**  
**IMA**  
**Priess & Horstmann**  
**Alberti**

**Drilling Drives**  
**Copy Milling Units**  
**Milling Spindles**

By the way, we also have a broad range of overhauled control units and actuators on stock, e.g. Ferrocontrol or Indramat - needless to say completely overhauled and tested with a 1 year warranty.

Or do you need any spare parts for cold glue application systems?  
Just give us ring!
